# SUBJECT INDEX

**Absorbers**

Vibration Control of Beams by Beam-Type Dynamic Vibration Absorbers, Tadayoshi Aida, Susumu Toda, Norio Ogawa and Yasuo Imada, EM Feb. 92, p248-258.

**Acoustic waves**

Influence of Seafloor on Acoustic Plane Wave, L. H. Huang, EM Oct. 92, p1987-2004.

**Active control**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

**Adhesive bonding**

Torsional Stresses in Tubular Lap Joints with Tapered Adherends, D. Chen and S. Cheng, EM Sept. 92, p1962-1973.

**Adjustment**

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

**Aerodynamics**

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Aggregates**

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

**Analysis**

Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

Coupled Vertical and Horizontal Galloping, Kathleen F. Jones, EM Jan. 92, p92-107.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

Time Domain Analysis of Dynamically Loaded Single Piles, S. M. Mamoon and P. K. Banerjee, EM Jan. 92, p140-160.

**Anisotropic materials**

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

**Anisotropic plates**

Three-Dimensional Solutions for Thermal Buckling of Multilayered Anisotropic Plates, Ahmed K. Noor and W. Scott Burton, EM Apr. 92, p683-701.

**Anisotropic shells**

Family of Iterative Shear-Deformation Theories for Shallow Shells, Zenon Rychter, EM Nov. 92, p2159-2175.

**Anisotropic soils**

Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

**Anisotropy**

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

**Approximation methods**

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

**Arches**

Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.

Stability of Masonry Piers and Arches, Thomas E. Boothby and Colin B. Brown, EM Feb. 92, p367-383.

**Artificial intelligence**

Knowledge-Based Modeling of Material Behavior with Neural Networks, J. Ghaboussi, J. H. Garrett, Jr. and X. Wu, EM Jan. 91, p132-153.

**ASCE Publications**

*Discussion of:* Structural Damping Estimation for Long-Span Bridges, John David Littler, EM Apr. 92, p847-850.

**Attenuation**

Extended Split-Hopkinson Bar Analysis for Attenuating Materials, Conrad W. Felice, Edward S. Gaffney and Joseph A. Brown, EM May 91, p1119-1135.

**Auto-regressive moving-average model**

Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

Recursive Parameter Estimation for ARMA Simulations, Bingqi Miao, EM Dec. 92, p2484-2490.

**Axial compression**

Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

**Axial loads**

Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

**Axisymmetry**

Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

Time Domain Analysis of Dynamically Loaded Single Piles, S. M. Mamoon and P. K. Banerjee, EM Jan. 92, p140-160.

**Barriers**

Noise Barrier Simulated by Rigid Screen with Back Wall, L. H. Huang and T. M. Kung, EM Jan. 92, p40-55.

**Bars**

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

**Base isolation**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III , EM May 92, p921-941.

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Beam columns**

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

**Beams**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

Sensitivity Analysis of Thin-Walled I-Beams Resting on Elastic Foundation, B. B. Budkowska and C. Szymczak, EM June 92, p1239-1248.

Theoretical Study of Crack-Induced Eigenfrequency Changes on Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM Feb. 92, p384-396.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

Vibration Control of Beams by Beam-Type Dynamic Vibration Absorbers, Tadayoshi Aida, Susumu Toda, Norio Ogawa and Yasuo Imada, EM Feb. 92, p248-258.

**Bearing capacity**

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

**Bending**

Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Bending moments**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

Response of Plates of Arbitrary Shape Subject to Static Loading, K. M. Liew, EM Sept. 92, p1783-1794.

**Bifurcations**

Branch Switching in Bifurcation of Structures, Fumio Fujii and Kok Keong Choong, EM Aug. 92, p1578-1596.

Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

**Birefringence**

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

**Boreholes**

Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

**Boundary conditions**

Exact Solution for General Torsion Problems Using Boundary Singularities, Omri Rand, EM Oct. 92, p2141-2147.

**Boundary element method**

Boundary-Element Direct Reanalysis for Continuum Structures, J. H. Kane, B. L. Keshava Kumar and R. H. Gallagher, EM Aug. 92, p1679-1691.

Frictionless Contact with BEM Using Quadratic Programming, Srđan Simunović and Sunil Saigal, EM Sept. 92, p1876-1891.

Time Domain Analysis of Dynamically Loaded Single Piles, S. M. Mamoon and P. K. Banerjee, EM Jan. 92, p140-160.

**Boundary layer**

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

**Boundary value problems**

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

**Bounding surface**

Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

**Bracing**

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Bridges, spans**

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Brittleness**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

**Buckling**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

Buckling of Columns of Variable Flexural Rigidity, A. Siginer, EM Mar. 92, p640-643.

Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

Buckling of Skew Plates and Corner Condition for Simply Supported Edges, C. M. Wang, K. M. Liew and W. A. M. Alwis, EM Apr. 92, p651-662.

Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.

Critical Review of Thin-Plate Stability Equations, John Platt, Gwynne Davies and Cyril Snell, EM Mar. 92, p481-495.

Dimensional Analysis of Buckling of Stiffened Composite Shells, B. Moradi and I. D. Parsons, EM Mar. 92, p557-574.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Elastic Buckling Coefficients for Long, Unstiffened Plates, Julie Mark Cohen, EM Dec. 92, p2491-2496.

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

Stability of Built-up Columns, Atle Gjelsvik, EM June 91, p1331-1345.

Stability of Frames with Grade Beam and Soil Interaction, George Lin, EM Jan. 92, p125-139.

Stiffness Matrix for Nonlinear Analysis of Thin-Walled Frames, Aura Conci, EM Sept. 92, p1859-1875.

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

Three-Dimensional Solutions for Thermal Buckling of Multilayered Anisotropic Plates, Ahmed K. Noor and W. Scott Burton, EM Apr. 92, p683-701.

Use of Engineering Strain and Trefftz Theory in Buckling of Columns, C. M. Wang and W. A. M. Alwis, EM Oct. 92, p2135-2140.

**Buffeting**

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Buildings**

Large-Displacement Effects on Dynamic Response of Eccentric Buildings, Lidia La Mendola and Maurizio Papia, EM May 91, p954-973.

**Buried pipes**

Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

**Cables**

Dynamic Behavior of Nonlinear Cable System. I, S. Mesarovic and D. A. Gasparini, EM May 92, p890-903.

Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

**Cables, ropes**

Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

**Cantilevers**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

**Cap model**

Mixed Hardening, Three-Invariants Dependent Cap Model, Sahel N. Abduljauwad, Isa M. Al-Buraim and Hamdan N. Al-Ghamedy, EM Mar. 92, p620-637.

**Catenaries**

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

**Cavitation**

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

**Cavities**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

**Chaos**

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

**Clamps**

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

**Clay structure**

Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

**Clays**

Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

**Closed form solutions**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Exact Solution for General Torsion Problems Using Boundary Singularities, Omri Rand, EM Oct. 92, p2141-2147.

Random Vibration under Propagating Excitation: Closed-Form Solutions, Ronald S. Harichandran, EM Mar. 92, p575-586.

**Coating**

Thermal Stresses in Bi-Coated Structures, Mauro Ferrari and Luca Lutterotti, EM Sept. 92, p1928-1938.

**Coefficients**

Elastic Buckling Coefficients for Long, Unstiffened Plates, Julie Mark Cohen, EM Dec. 92, p2491-2496.

**Cofferdams**

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

**Cohesion**

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

**Cohesionless soils**

Mixed Hardening, Three-Invariants Dependent Cap Model, Sahel N. Abduljauwad, Isa M. Al-Buraim and Hamdan N. Al-Ghamedy, EM Mar. 92, p620-637.

**Collapse**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

Collapse Mode of Elastic-Plastic Structures, F. Giambanco, T. Panzeca and M. Zito, EM June 92, p1083-1092.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

**Collisions**

Collisional Restitution Dependence on Viscosity, Jan Lundberg and Hayley H. Shen, EM May 92, p979-989.

**Columns**

Buckling of Columns of Variable Flexural Rigidity, A. Siginer, EM Mar. 92, p640-643.

Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

Elastic Stability of Composite Column, Yaxin Li, EM Nov. 92, p2320-2327.

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

Flexural-Torsional Stability of Thin-Walled Columns, Juha Paavola and Seppo Salonen, EM Dec. 92, p2384-2400.

Stability of Built-up Columns, Atle Gjelsvik, EM June 91, p1331-1345.

Stability of Column Lowered Into Liquid of Higher Density, C. Y. Wang, EM Jan. 92, p204-210.

Use of Engineering Strain and Trefftz Theory in Buckling of Columns, C. M. Wang and W. A. M. Alwis, EM Oct. 92, p2135-2140.

**Columns, restrained**

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

**Compaction**

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Compatibility**

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

**Compliance**

Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

**Composite materials**

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

Fracture-Based Two-Way Debonding Model for Discontinuous Fibers in Elastic Matrix, Christopher K. Y. Leung, EM Nov. 92, p2298-2318.

Micromechanics-Based Constitutive Model for Interface Shear, M. P. Divakar and A. Fafitis, EM July 92, p1317-1337.

Postbuckling of Polar Orthotropic Circular Plates—Retrospective, Archibald N. Sherbourne and Mahesh D. Pandey, EM Oct. 92, p2087-2103.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Composite structures**

Dimensional Analysis of Buckling of Stiffened Composite Shells, B. Moradi and I. D. Parsons, EM Mar. 92, p557-574.

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

Elastic Stability of Composite Column, Yaxin Li, EM Nov. 92, p2320-2327.

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

**Compression**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Mixed Hardening, Three-Invariants Dependent Cap Model, Sahel N. Abduljauwad, Isa M. Al-Buraim and Hamdan N. Al-Ghamedy, EM Mar. 92, p620-637.

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Compressive strength**

Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

**Computation**

Fundamental Frequency of Tapered Plates by Differential Quadrature, Anant R. Kukreti, Jalaleddin Farsa and Charles W. Bert, EM June 92, p1221-1238.

Random Vibration under Propagating Excitation: Closed-Form Solutions, Ronald S. Harichandran, EM Mar. 92, p575-586.

**Computer applications**

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Concrete**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

Damage of Concrete in Fatigue, A. Alliche and D. François, EM Nov. 92, p2176-2190.

FEM Modeling of Fictitious Crack Propagation in Concrete, Walter H. Gerstle and Ming Xie, EM Feb. 92, p416-434.

Geometric Damage Tensor Based on Microplane Model, Ignacio Carol, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 91, p2429-2448.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Concrete, reinforced**

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

**Concrete slabs**

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

**Conformal mapping**

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

**Conservation**

Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

**Constitutive models**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

Constitutive Model for Ice, H. A. Khoo and T. M. Hrudey, EM Feb. 92, p259-279.

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

Micromechanics-Based Constitutive Model for Interface Shear, M. P. Divakar and A. Fafitis, EM July 92, p1317-1337.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Constitutive relations**

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Geometric Damage Tensor Based on Microplane Model, Ignacio Carol, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 91, p2429-2448.

**Construction methods**

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

**Contact pressure**

Frictionless Contact with BEM Using Quadratic Programming, Srđan Simunović and Sunil Saigal, EM Sept. 92, p1876-1891.

**Continuum mechanics**

Boundary-Element Direct Reanalysis for Continuum Structures, J. H. Kane, B. L. Keshava Kumar and R. H. Gallagher, EM Aug. 92, p1679-1691.

Geometric Damage Tensor Based on Microplane Model, Ignacio Carol, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 91, p2429-2448.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

Wave Attenuation in Viscoelastic Continuum with Fading Memory, Song-tao Xue, Jun Tobita, Tetsuya Hanzawa and Masanori Izumi, EM Aug. 92, p1597-1611.

**Control systems**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

**Convergence**

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

**Core**

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

**Crack initiation**

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

**Crack propagation**

FEM Modeling of Fictitious Crack Propagation in Concrete, Walter H. Gerstle and Ming Xie, EM Feb. 92, p416-434.

Probability of Crack Growth in Poisson Field of Penny Cracks, S. Mesarovic, D. Gasparini, S. Muju and M. McNelis, EM May 92, p961-978.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

**Cracking**

FEM Modeling of Fictitious Crack Propagation in Concrete, Walter H. Gerstle and Ming Xie, EM Feb. 92, p416-434.

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Cracks**

Probability of Crack Growth in Poisson Field of Penny Cracks, S. Mesarovic, D. Gasparini, S. Muju and M. McNelis, EM May 92, p961-978.

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

Theoretical Study of Crack-Induced Eigenfrequency Changes on Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM Feb. 92, p384-396.

**Creep**

Constitutive Model for Ice, H. A. Khoo and T. M. Hrudey, EM Feb. 92, p259-279.

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

**Critical load**

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Currents**

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

**Curvature**

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

**Curved beams**

Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.

**Cyclic loads**

Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

Collapse Mode of Elastic-Plastic Structures, F. Giambanco, T. Panzeca and M. Zito, EM June 92, p1083-1092.

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

Inelastic Response of Variable Stiffness Members under Cyclic Loading, Demeter G. Fertis and Chin T. Lee, EM July 92, p1406-1422.

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Mixed Hardening, Three-Invariants Dependent Cap Model, Sahel N. Abduljauwad, Isa M. Al-Buraim and Hamdan N. Al-Ghamedy, EM Mar. 92, p620-637.

**Cylinders**

Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

**Cylindrical shells**

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

**Damage**

Constitutive Model for Ice, H. A. Khoo and T. M. Hrudey, EM Feb. 92, p259-279.

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

Damage of Concrete in Fatigue, A. Alliche and D. François, EM Nov. 92, p2176-2190.

Geometric Damage Tensor Based on Microplane Model, Ignacio Carol, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 91, p2429-2448.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Damage assessment**

Damage Diagnosis of Steel Frames Using Vibrational Signature Analysis, G. C. Yao, K. C. Chang and G. C. Lee, EM Sept. 92, p1949-1961.

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

**Damping**

Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

Destabilizing Effect of Magnetic Damping in Plate Strip, Jong S. Lee, EM Jan. 92, p161-173.

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Deflection**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

Response of Plates of Arbitrary Shape Subject to Static Loading, K. M. Liew, EM Sept. 92, p1783-1794.

**Deformation**

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

Elastoplastic Deformation for Particulates with Frictional Contacts, Ching S. Chang, Anil Misra and Kofi Acheampong, EM Aug. 92, p1692-1707.

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

Use of Engineering Strain and Trefftz Theory in Buckling of Columns, C. M. Wang and W. A. M. Alwis, EM Oct. 92, p2135-2140.

**Densification**

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Depth**

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

**Design**

Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

**Dewatering**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Diaphragms**

Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

**Differential equations**

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

Explicit Equations of Motion of Discrete System of Disks in Two Dimensions, Oleg Vinogradov, EM Sept. 92, p1850-1858.

Numerical Differentiation Using Gaussian Quadrature, B. L. Ly, EM Nov. 90, p2568-2572.

**Dilatancy**

Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

**Dimensional analysis**

Dimensional Analysis of Buckling of Stiffened Composite Shells, B. Moradi and I. D. Parsons, EM Mar. 92, p557-574.

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

**Displacement**

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

Large-Displacement Effects on Dynamic Response of Eccentric Buildings, Lidia La Mendola and Maurizio Papia, EM May 91, p954-973.

Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

New Spline Finite Element for Plate Bending, S. C. Fan and M. H. Luah, EM June 92, p1065-1082.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

**Displacements**

Family of Iterative Shear-Deformation Theories for Shallow Shells, Zenon Rychter, EM Nov. 92, p2159-2175.

**Domes, structural**

Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

**Dynamic analysis**

Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

Inelastic Response of Variable Stiffness Members under Cyclic Loading, Demeter G. Fertis and Chin T. Lee, EM July 92, p1406-1422.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Dynamic loads**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

Time Domain Analysis of Dynamically Loaded Single Piles, S. M. Mamoon and P. K. Banerjee, EM Jan. 92, p140-160.

**Dynamic response**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Dynamic Behavior of Nonlinear Cable System. I, S. Mesarovic and D. A. Gasparini, EM May 92, p890-903.

Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

Extended Split-Hopkinson Bar Analysis for Attenuating Materials, Conrad W. Felice, Edward S. Gaffney and Joseph A. Brown, EM May 91, p1119-1135.

Large-Displacement Effects on Dynamic Response of Eccentric Buildings, Lidia La Mendola and Maurizio Papia, EM May 91, p954-973.

Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.

Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Dynamic stress measurement**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

**Dynamic structural analysis**

Analytical Solutions for Thick, Doubly Curved, Laminated Shells, Jiarang Fan and Juyong Zhang, EM July 92, p1338-1356.

**Dynamics**

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

Explicit Equations of Motion of Discrete System of Disks in Two Dimensions, Oleg Vinogradov, EM Sept. 92, p1850-1858.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

**Earthquake engineering**

Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III., EM May 92, p921-941.

**Earthquake excitation**

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

Random Vibration under Propagating Excitation: Closed-Form Solutions, Ronald S. Harichandran, EM Mar. 92, p575-586.

**Earthquake resistant structures**

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III., EM May 92, p921-941.

Stable Controllers for Instantaneous Optimal Control, J. N. Yang, Z. Li and S. C. Liu, EM Aug. 92, p1612-1630.

**Earthquakes**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Stable Controllers for Instantaneous Optimal Control, J. N. Yang, Z. Li and S. C. Liu, EM Aug. 92, p1612-1630.

Wave Attenuation in Viscoelastic Continuum with Fading Memory, Song-tao Xue, Jun Tobita, Tetsuya Hanzawa and Masanori Izumi, EM Aug. 92, p1597-1611.

**Eccentricity**

Large-Displacement Effects on Dynamic Response of Eccentric Buildings, Lidia La Mendola and Maurizio Papia, EM May 91, p954-973.

**Effective length**

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Eigenvalues**

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Eigenvectors**

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Elastic analysis**
Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

**Elastic foundations**
Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

Sensitivity Analysis of Thin-Walled I-Beams Resting on Elastic Foundation, B. B. Budkowska and C. Szymczak, EM June 92, p1239-1248.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

**Elastic media**
Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

**Elasticity**
Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

Buckling of Skew Plates and Corner Condition for Simply Supported Edges, C. M. Wang, K. M. Liew and W. A. M. Alwis, EM Apr. 92, p651-662.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Elastic Stability of Composite Column, Yaxin Li, EM Nov. 92, p2320-2327.

Family of Iterative Shear-Deformation Theories for Shallow Shells, Zenon Rychter, EM Nov. 92, p2159-2175.

Frictionless Contact with BEM Using Quadratic Programming, Srđan Šimunović and Sunil Saigal, EM Sept. 92, p1876-1891.

Influence of Seafloor on Acoustic Plane Wave, L. H. Huang, EM Oct. 92, p1987-2004.

Three-Dimensional Solutions for Thermal Buckling of Multilayered Anisotropic Plates, Ahmed K. Noor and W. Scott Burton, EM Apr. 92, p683-701.

Torsional Stresses in Tubular Lap Joints with Tapered Adherends, D. Chen and S. Cheng, EM Sept. 92, p1962-1973.

**Elastoplasticity**
Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

**Energy**
Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

**Energy dissipation**
Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

**Energy methods**
Elastic Stability of Composite Column, Yaxin Li, EM Nov. 92, p2320-2327.

**Equations of motion**
Dynamic Behavior of Nonlinear Cable System. I, S. Mesarovic and D. A. Gasparini, EM May 92, p890-903.

**Error analysis**
Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

**Estimation**
Recursive Parameter Estimation for ARMA Simulations, Bingqi Miao, EM Dec. 92, p2484-2490.

**Estuaries**
Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

**Evolution, development**
Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Excitation**
Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Large-Displacement Effects on Dynamic Response of Eccentric Buildings, Lidia La Mendola and Maurizio Papia, EM May 91, p954-973.

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

Random Vibration under Propagating Excitation: Closed-Form Solutions, Ronald S. Harichandran, EM Mar. 92, p575-586.

**Failure modes**
Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

**Failures**
Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Fatigue**
Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.

Simulation of Improved Gaussian Time History, Loren D. Lutes and Jin Wang, EM Jan. 91, p218-224.

**Fatigue life**

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

**Fatigue tests**

Damage of Concrete in Fatigue, A. Alliche and D. François, EM Nov. 92, p2176-2190.

**Fiber composites**

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Fiber reinforced materials**

Fracture-Based Two-Way Debonding Model for Discontinuous Fibers in Elastic Matrix, Christopher K. Y. Leung, EM Nov. 92, p2298-2318.

**Fibers**

Fracture-Based Two-Way Debonding Model for Discontinuous Fibers in Elastic Matrix, Christopher K. Y. Leung, EM Nov. 92, p2298-2318.

**Filtration**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Finite difference method**

Elastic Buckling Coefficients for Long, Unstiffened Plates, Julie Mark Cohen, EM Dec. 92, p2491-2496.

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Finite differences**

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

**Finite element method**

Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

FEM Modeling of Fictitious Crack Propagation in Concrete, Walter H. Gerstle and Ming Xie, EM Feb. 92, p416-434.

Microplane Model for Cyclic Triaxial Behavior of Concrete, Joško Ožbolt and Zdeněk P. Bažant, EM July 92, p1365-1386.

Multivariable Analysis Using Isoparametric Finite Elements, Ping Wang and William K. Rule, EM Aug. 92, p1730-1737.

Nonlinear Stability Analysis of Steel Members by Finite Element Method, Zuyan Shen and Qilin Zhang, EM Mar. 92, p445-461.

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Finite elements**

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

Improved Rectangular Element for Shear Deformable Plates, Fuh-Gwo Yuan and Robert E. Miller, EM Feb. 92, p312-328.

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

New Spline Finite Element for Plate Bending, S. C. Fan and M. H. Luah, EM June 92, p1065-1082.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Fixed objects**

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

**Flexibility**

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

**Flexure**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

Buckling of Columns of Variable Flexural Rigidity, A. Siginer, EM Mar. 92, p640-643.

Flexural-Torsional Stability of Thin-Walled Columns, Juha Paavola and Seppo Salonen, EM Dec. 92, p2384-2400.

**Floors**

Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

**Flow patterns**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

**Fluid flow**

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Fluid-structure interaction**

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Force**

Damage Diagnosis of Steel Frames Using Vibrational Signature Analysis, G. C. Yao, K. C. Chang and G. C. Lee, EM Sept. 92, p1949-1961.

**Foundation beams**

Stability of Frames with Grade Beam and Soil Interaction, George Lin, EM Jan. 92, p125-139.

**Fourier series**

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

**Fracture mechanics**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

Fracture-Based Two-Way Debonding Model for Discontinuous Fibers in Elastic Matrix, Christopher K. Y. Leung, EM Nov. 92, p2298-2318.

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

**Fractures**

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

**Framed structures**

Stability of Frames with Grade Beam and Soil Interaction, George Lin, EM Jan. 92, p125-139.

**Frames**

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

**Free flow**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

**Free surfaces**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.

**Frequencies**

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

**Frequency**

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

Fundamental Frequency of Tapered Plates by Differential Quadrature, Anant R. Kukreti, Jalaleddin Farsa and Charles W. Bert, EM June 92, p1221-1238.

**Gaussian process**

Load-Space Formulation for Time-Dependent Structural Reliability, R. E. Melchers, EM May 92, p853-870.

Numerical Differentiation Using Gaussian Quadrature, B. L. Ly, EM Nov. 90, p2568-2572.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

Simulation of Improved Gaussian Time History, Loren D. Lutes and Jin Wang, EM Jan. 91, p218-224.

**Granular materials**

Elastoplastic Deformation for Particulates with Frictional Contacts, Ching S. Chang, Anil Misra and Kofi Acheampong, EM Aug. 92, p1692-1707.

Explicit Equations of Motion of Discrete System of Disks in Two Dimensions, Oleg Vinogradov, EM Sept. 92, p1850-1858.

Shear-Band Analysis in Idealized Granular Material, J. P. Bardet and J. Proubet, EM Feb. 92, p397-415.

**Granular media**

Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

**Grid systems**

Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

**Ground water**

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

**Heat transfer**
Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

**High strength concretes**
Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

**High strength steel**
Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.

**Hinges**
Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

**Holes**
Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

**Hydrodynamics**
Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Hyperbolic parabolic shells**
Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

**Hypoplasticity**
Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

**Hysteresis**
Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

Inelastic Response of Variable Stiffness Members under Cyclic Loading, Demeter G. Fertis and Chin T. Lee, EM July 92, p1406-1422.

**Hysteretic systems**
Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

**Ice**
Constitutive Model for Ice, H. A. Khoo and T. M. Hrudey, EM Feb. 92, p259-279.

**Ice cover**
Coupled Vertical and Horizontal Galloping, Kathleen F. Jones, EM Jan. 92, p92-107.

**Identification**
Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

**Impact**
Multivariable Analysis Using Isoparametric Finite Elements, Ping Wang and William K. Rule, EM Aug. 92, p1730-1737.

**Impact forces**
Collisional Restitution Dependence on Viscosity, Jan Lundberg and Hayley H. Shen, EM May 92, p979-989.

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

**Imperfections**
Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

**Impulsive loads**
Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

**Inclusions**
Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

**Interface shear**
Micromechanics-Based Constitutive Model for Interface Shear, M. P. Divakar and A. Fafitis, EM July 92, p1317-1337.

**Interfaces**
Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

**Internal pressure**
Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

**Interpolation**
Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.
Numerical Differentiation Using Gaussian Quadrature, B. L. Ly, EM Nov. 90, p2568-2572.

**Isotropic material**
Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

**Isotropy**
Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Joints**
Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

**Kinematics**
Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.
Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Knowledge-based systems**
Knowledge-Based Modeling of Material Behavior with Neural Networks, J. Ghaboussi, J. H. Garrett, Jr. and X. Wu, EM Jan. 91, p132-153.

**Laboratory tests**
Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

**Lakes**
Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

**Laminates**
Analytical Solutions for Thick, Doubly Curved, Laminated Shells, Jiarang Fan and Juyong Zhang, EM July 92, p1338-1356.
Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

**Laplace transform**
Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

**Lattice design**
Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

**Layered systems**
Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.
Thermal Stresses in Bi-Coated Structures, Mauro Ferrari and Luca Lutterotti, EM Sept. 92, p1928-1938.

**Length**
Optimal Linear Segmented Structures with Variable Segment Boundaries, C. J. Goh and C. M. Wang, EM Dec. 92, p2376-2383.

**Limit states**
Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

**Linear systems**
Optimal Linear Segmented Structures with Variable Segment Boundaries, C. J. Goh and C. M. Wang, EM Dec. 92, p2376-2383.

**Liquefaction**
Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

**Liquids**
Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

**Load distribution**
Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.
Stability of Column Lowered Into Liquid of Higher Density, C. Y. Wang, EM Jan. 92, p204-210.

**Load factors**
Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

**Load tests**
Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

**Loading**
Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.
High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

**Loads**
Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.
Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.
Load-Space Formulation for Time-Dependent Structural Reliability, R. E. Melchers, EM May 92, p853-870.
Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

**Magnetic field effects**
Destabilizing Effect of Magnetic Damping in Plate Strip, Jong S. Lee, EM Jan. 92, p161-173.

**Markov process**

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

**Masonry**

Stability of Masonry Piers and Arches, Thomas E. Boothby and Colin B. Brown, EM Feb. 92, p367-383.

**Materials, properties**

Knowledge-Based Modeling of Material Behavior with Neural Networks, J. Ghaboussi, J. H. Garrett, Jr. and X. Wu, EM Jan. 91, p132-153.

**Materials tests**

Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

**Mathematical models**

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

**Measurement**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Mechanical engineering**

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Membranes**

Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

**Mesh generation**

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Metals**

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

Thermal Stresses in Bi-Coated Structures, Mauro Ferrari and Luca Lutterotti, EM Sept. 92, p1928-1938.

**Modal analysis**

Damage Diagnosis of Steel Frames Using Vibrational Signature Analysis, G. C. Yao, K. C. Chang and G. C. Lee, EM Sept. 92, p1949-1961.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

**Model accuracy**

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

**Model analysis**

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

**Model verification**

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

**Modeling**

Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

Damage of Concrete in Fatigue, A. Alliche and D. François, EM Nov. 92, p2176-2190.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Knowledge-Based Modeling of Material Behavior with Neural Networks, J. Ghaboussi, J. H. Garrett, Jr. and X. Wu, EM Jan. 91, p132-153.

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Models**

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Moisture content**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Moments**

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Simple Cord Composites, Anthony J. Paris, Ching-Chang Lin and George A. Costello, EM Sept. 92, p1939-1948.

**Monte Carlo method**

Optimal Importance-Sampling Density Estimator, George L. Ang, Alfredo H-S. Ang and Wilson H. Tang, EM June 92, p1146-1163.

**Mortars**

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

**Motion**

Coupled Vertical and Horizontal Galloping, Kathleen F. Jones, EM Jan. 92, p92-107.

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

**Multistory buildings**

Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

**Narrowband**

Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.

**Natural frequency**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

Theoretical Study of Crack-Induced Eigenfrequency Changes on Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM Feb. 92, p384-396.

**Navier-Stokes equations**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

**Noise**

Noise Barrier Simulated by Rigid Screen with Back Wall, L. H. Huang and T. M. Kung, EM Jan. 92, p40-55.

**Noise control**

Noise Barrier Simulated by Rigid Screen with Back Wall, L. H. Huang and T. M. Kung, EM Jan. 92, p40-55.

**Nondestructive tests**

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

**Nonlinear analysis**

Frame Buckling Analysis with Full Consideration of Joint Compatibilities, Yeong-Bin Yang and Shyh-Rong Kuo, EM May 92, p871-889.

Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III., EM May 92, p921-941.

Stiffness Matrix for Nonlinear Analysis of Thin-Walled Frames, Aura Conci, EM Sept. 92, p1859-1875.

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Nonlinear differential equations**

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

Postbuckling of Polar Orthotropic Circular Plates—Retrospective, Archibald N. Sherbourne and Mahesh D. Pandey, EM Oct. 92, p2087-2103.

**Nonlinear response**

Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

**Nonlinear systems**

Branch Switching in Bifurcation of Structures, Fumio Fujii and Kok Keong Choong, EM Aug. 92, p1578-1596.

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Dynamic Behavior of Nonlinear Cable System. I, S. Mesarovic and D. A. Gasparini, EM May 92, p890-903.

Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

**Nonproportional loading**

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

**Numerical analysis**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

Analytical Solutions for Thick, Doubly Curved, Laminated Shells, Jiarang Fan and Juyong Zhang, EM July 92, p1338-1356.

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

Branch Switching in Bifurcation of Structures, Fumio Fujii and Kok Keong Choong, EM Aug. 92, p1578-1596.

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Improved Rectangular Element for Shear Deformable Plates, Fuh-Gwo Yuan and Robert E. Miller, EM Feb. 92, p312-328.

Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.

Postbuckling of Polar Orthotropic Circular Plates—Retrospective, Archibald N. Sherbourne and Mahesh D. Pandey, EM Oct. 92, p2087-2103.

Shear-Band Analysis in Idealized Granular Material, J. P. Bardet and J. Proubet, EM Feb. 92, p397-415.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

**Numerical calculations**

Numerical Differentiation Using Gaussian Quadrature, B. L. Ly, EM Nov. 90, p2568-2572.

**Numerical models**

Review of Equations of Conservation in Curvilinear Coordinates, Pei-Fang Wang, EM Nov. 92, p2265-2281.

**Ocean engineering**

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Offshore pipeline**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

**Offshore structures**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

**Optimal control methods**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

Optimal Linear Segmented Structures with Variable Segment Boundaries, C. J. Goh and C. M. Wang, EM Dec. 92, p2376-2383.

Stable Controllers for Instantaneous Optimal Control, J. N. Yang, Z. Li and S. C. Liu, EM Aug. 92, p1612-1630.

**Optimal design**

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

**Optimization**

Boundary-Element Direct Reanalysis for Continuum Structures, J. H. Kane, B. L. Keshava Kumar and R. H. Gallagher, EM Aug. 92, p1679-1691.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

Optimal Linear Segmented Structures with Variable Segment Boundaries, C. J. Goh and C. M. Wang, EM Dec. 92, p2376-2383.

Stability of Masonry Piers and Arches, Thomas E. Boothby and Colin B. Brown, EM Feb. 92, p367-383.

**Orthotropic plate**

Postbuckling of Polar Orthotropic Circular Plates—Retrospective, Archibald N. Sherbourne and Mahesh D. Pandey, EM Oct. 92, p2087-2103.

**Panels**

Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

**Parameters**

Recursive Parameter Estimation for ARMA Simulations, Bingqi Miao, EM Dec. 92, p2484-2490.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Particle interactions**

Collisional Restitution Dependence on Viscosity, Jan Lundberg and Hayley H. Shen, EM May 92, p979-989.

**Particle motion**

Particle Motion in Rotary Screen, Richard Ian Stessel and S. C. Kranc, EM Mar. 92, p604-619.

**Particles**

Shear-Band Analysis in Idealized Granular Material, J. P. Bardet and J. Proubet, EM Feb. 92, p397-415.

**Particulate media**

Elastoplastic Deformation for Particulates with Frictional Contacts, Ching S. Chang, Anil Misra and Kofi Acheampong, EM Aug. 92, p1692-1707.

**Passive control**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Vibration Control of Beams by Beam-Type Dynamic Vibration Absorbers, Tadayoshi Aida, Susumu Toda, Norio Ogawa and Yasuo Imada, EM Feb. 92, p248-258.

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Penetration**

Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

**Periodic functions**

Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.

**Perturbation**

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

**Photoelasticity**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

**Piers**

Stability of Masonry Piers and Arches, Thomas E. Boothby and Colin B. Brown, EM Feb. 92, p367-383.

**Pile foundations**

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

**Plane strain**

Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

**Plane waves**

Influence of Seafloor on Acoustic Plane Wave, L. H. Huang, EM Oct. 92, p1987-2004.

**Plastic hinges**

Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

**Plastic properties**

Collapse Mode of Elastic-Plastic Structures, F. Giambanco, T. Panzeca and M. Zito, EM June 92, p1083-1092.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

**Plasticity**

Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Moving Hinge in Large-Displacement Problems, F. Lu and A. N. Sherbourne, EM Sept. 92, p1840-1849.

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

Strain-Based Constitutive Model with Mixed Evolution Rules for Concrete, David J. Stevens and Dajin Liu, EM June 92, p1184-1200.

**Plastics**

Collapse Mode of Elastic-Plastic Structures, F. Giambanco, T. Panzeca and M. Zito, EM June 92, p1083-1092.

**Plates**

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

Buckling of Skew Plates and Corner Condition for Simply Supported Edges, C. M. Wang, K. M. Liew and W. A. M. Alwis, EM Apr. 92, p651-662.

Critical Review of Thin-Plate Stability Equations, John Platt, Gwynne Davies and Cyril Snell, EM Mar. 92, p481-495.

Destabilizing Effect of Magnetic Damping in Plate Strip, Jong S. Lee, EM Jan. 92, p161-173.

Elastic Buckling Coefficients for Long, Unstiffened Plates, Julie Mark Cohen, EM Dec. 92, p2491-2496.

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

Fundamental Frequency of Tapered Plates by Differential Quadrature, Anant R. Kukreti, Jalaleddin Farsa and Charles W. Bert, EM June 92, p1221-1238.

Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

Improved Rectangular Element for Shear Deformable Plates, Fuh-Gwo Yuan and Robert E. Miller, EM Feb. 92, p312-328.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

New Spline Finite Element for Plate Bending, S. C. Fan and M. H. Luah, EM June 92, p1065-1082.

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

Response of Plates of Arbitrary Shape Subject to Static Loading, K. M. Liew, EM Sept. 92, p1783-1794.

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Poisson ratio**

Probability of Crack Growth in Poisson Field of Penny Cracks, S. Mesarovic, D. Gasparini, S. Muju and M. McNelis, EM May 92, p961-978.

**Polycrystalline**

Necking of Creep-Cavitating Bars, C. H. Lu and A. J. Levy, EM Apr. 92, p746-762.

**Polymers**

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

**Polynomials**

Response of Plates of Arbitrary Shape Subject to Static Loading, K. M. Liew, EM Sept. 92, p1783-1794.

**Pore water pressure**

Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

**Porosity**

Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Porous materials**

Influence of Seafloor on Acoustic Plane Wave, L. H. Huang, EM Oct. 92, p1987-2004.

**Portland cements**

Micromechanics-Based Constitutive Model for Interface Shear, M. P. Divakar and A. Fafitis, EM July 92, p1317-1337.

**Postbuckling behavior**

Postbuckling of Polar Orthotropic Circular Plates—Retrospective, Archibald N. Sherbourne and Mahesh D. Pandey, EM Oct. 92, p2087-2103.

**Power**

Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

**Predictions**

Collapse Mode of Elastic-Plastic Structures, F. Giambanco, T. Panzeca and M. Zito, EM June 92, p1083-1092.

Multivariable Analysis Using Isoparametric Finite Elements, Ping Wang and William K. Rule, EM Aug. 92, p1730-1737.

**Pressures**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

**Probabilistic methods**

Conditional and Joint Failure Surface Crossing of Stochastic Processes, Øistein Hagen, EM Sept. 92, p1814-1839.

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Probability**

Conditional and Joint Failure Surface Crossing of Stochastic Processes, Øistein Hagen, EM Sept. 92, p1814-1839.

Load-Space Formulation for Time-Dependent Structural Reliability, R. E. Melchers, EM May 92, p853-870.

**Probability distribution**

Simulation of Improved Gaussian Time History, Loren D. Lutes and Jin Wang, EM Jan. 91, p218-224.

**Probability theory**

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

**Quadratic programming**

Frictionless Contact with BEM Using Quadratic Programming, Srđan Šimunović and Sunil Saigal, EM Sept. 92, p1876-1891.

**Radiation**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Random processes**

Recursive Parameter Estimation for ARMA Simulations, Bingqi Miao, EM Dec. 92, p2484-2490.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

Simulation-Based Excursion Statistics, Gordon A. Fenton and Erik H. Vanmarcke, EM June 92, p1129-1145.

**Random variables**

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Random vibration**

Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

Random Vibration under Propagating Excitation: Closed-Form Solutions, Ronald S. Harichandran, EM Mar. 92, p575-586.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Random waves**

Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.

Modal and Wave Load Identification by ARMA Calibration, Jakob Laigaard Jensen, Poul Henning Kirkegaard and Rune Brincker, EM June 92, p1268-1273.

**Rectangular cross section**

Bending of Rectangular Cross-Section Cantilever with Cylindrical Cutouts, A. K. Naghdi, EM Apr. 92, p831-842.

**Reinforcement**

Softening and Snap-Through Behavior of Reinforced Elements, C. Bosco and A. Carpinteri, EM Aug. 92, p1564-1577.

**Reliability**

Simulation-Based Excursion Statistics, Gordon A. Fenton and Erik H. Vanmarcke, EM June 92, p1129-1145.

**Reliability analysis**

Conditional and Joint Failure Surface Crossing of Stochastic Processes, Øistein Hagen, EM Sept. 92, p1814-1839.

Optimal Importance-Sampling Density Estimator, George L. Ang, Alfredo H-S. Ang and Wilson H. Tang, EM June 92, p1146-1163.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Rheology**

Geometric Damage Tensor Based on Microplane Model, Ignacio Carol, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 91, p2429-2448.

**Rigid frames**

Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

**Rigid-body dynamics**

Nonlinear Impact and Chaotic Response of Slender Rocking Objects, Solomon C. S. Yim and Huan Lin, EM Sept. 91, p2079-2100.

**Rigidity**

Buckling of Columns of Variable Flexural Rigidity, A. Siginer, EM Mar. 92, p640-643.

Frictionless Contact with BEM Using Quadratic Programming, Srđan Simunović and Sunil Saigal, EM Sept. 92, p1876-1891.

**Rings**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

Low-Order Interpolation Functions for Curved Beams, S. J. Pantazopoulou, EM Feb. 92, p329-350.

**Rocks**

Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

**Rods**

Exact Solution for General Torsion Problems Using Boundary Singularities, Omri Rand, EM Oct. 92, p2141-2147.

**Rotation**

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

Particle Motion in Rotary Screen, Richard Ian Stessel and S. C. Kranc, EM Mar. 92, p604-619.

**Sampling**

Optimal Importance-Sampling Density Estimator, George L. Ang, Alfredo H-S. Ang and Wilson H. Tang, EM June 92, p1146-1163.

**Sand**

Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Sandwich structures**

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

**Saturation**
Dynamics of Saturated Rocks. IV: Column and Borehole Problems, Irene Vgenopoulou and Dimitri E. Beskos, EM Sept. 92, p1795-1813.

**Screens**
Particle Motion in Rotary Screen, Richard Ian Stessel and S. C. Kranc, EM Mar. 92, p604-619.

**Sea floor**
Influence of Seafloor on Acoustic Plane Wave, L. H. Huang, EM Oct. 92, p1987-2004.

**Secondary systems**
Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Seepage**
Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

**Segmented elements**
Optimal Linear Segmented Structures with Variable Segment Boundaries, C. J. Goh and C. M. Wang, EM Dec. 92, p2376-2383.

**Seismic analysis**
Dynamics of Buildings with V-Shaped Plan, Sudhir K. Jain and Utpal K. Mandal, EM June 92, p1093-1112.

**Seismic design**
Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

**Seismic response**
Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III., EM May 92, p921-941.

**Sensitivity analysis**
Sensitivity Analysis of Thin-Walled I-Beams Resting on Elastic Foundation, B. B. Budkowska and C. Szymczak, EM June 92, p1239-1248.

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

**Shape**
Boundary-Element Direct Reanalysis for Continuum Structures, J. H. Kane, B. L. Keshava Kumar and R. H. Gallagher, EM Aug. 92, p1679-1691.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Shear**
Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Shear deformation**
Family of Iterative Shear-Deformation Theories for Shallow Shells, Zenon Rychter, EM Nov. 92, p2159-2175.

Improved Rectangular Element for Shear Deformable Plates, Fuh-Gwo Yuan and Robert E. Miller, EM Feb. 92, p312-328.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

**Shear flow**
Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

**Shear forces**
Stability of Built-up Columns, Atle Gjelsvik, EM June 91, p1331-1345.

**Shear strength**
Modeling Anisotropy of Clays at Critical State, S. Thevanayagam and J.-L. Chameau, EM Apr. 92, p786-806.

**Sheet piles**
Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

**Shell structures**
Analytical Solutions for Thick, Doubly Curved, Laminated Shells, Jiarang Fan and Juyong Zhang, EM July 92, p1338-1356.

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

**Shells**
Dimensional Analysis of Buckling of Stiffened Composite Shells, B. Moradi and I. D. Parsons, EM Mar. 92, p557-574.

**Signal processing**
Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

**Simple shear tests**
Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

**Simulation**
Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

Noise Barrier Simulated by Rigid Screen with Back Wall, L. H. Huang and T. M. Kung, EM Jan. 92, p40-55.

Optimal Importance-Sampling Density Estimator, George L. Ang, Alfredo H-S. Ang and Wilson H. Tang, EM June 92, p1146-1163.

Recursive Parameter Estimation for ARMA Simulations, Bingqi Miao, EM Dec. 92, p2484-2490.

Simulation of Improved Gaussian Time History, Loren D. Lutes and Jin Wang, EM Jan. 91, p218-224.

Simulation-Based Excursion Statistics, Gordon A. Fenton and Erik H. Vanmarcke, EM June 92, p1129-1145.

**Size effect**

FEM Modeling of Fictitious Crack Propagation in Concrete, Walter H. Gerstle and Ming Xie, EM Feb. 92, p416-434.

**Skewed structures**

Buckling of Skew Plates and Corner Condition for Simply Supported Edges, C. M. Wang, K. M. Liew and W. A. M. Alwis, EM Apr. 92, p651-662.

**Skin**

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

**Sliding**

Elastoplastic Deformation for Particulates with Frictional Contacts, Ching S. Chang, Anil Misra and Kofi Acheampong, EM Aug. 92, p1692-1707.

**Sludge**

Synchrotron Radiation Measurements of Degree of Saturation in Porous Matrix, Scott A. Wells and Richard I. Dick, EM Aug. 92, p1738-1744.

**Softening**

Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

Dynamic Analysis of Elastoplastic Softening Discretized Structures, C. Comi, A. Corigliano and G. Maier, EM Dec. 92, p2352-2375.

**Soil mechanics**

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

**Soil-pile interaction**

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

**Soils**

Associative Plasticity for Dilatant Soils, Panos D. Kiousis and Ali A. Abdulla, EM Apr. 92, p763-785.

Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

Extended Split-Hopkinson Bar Analysis for Attenuating Materials, Conrad W. Felice, Edward S. Gaffney and Joseph A. Brown, EM May 91, p1119-1135.

**Soil-structure interaction**

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

Stability of Frames with Grade Beam and Soil Interaction, George Lin, EM Jan. 92, p125-139.

**Solid waste management**

Particle Motion in Rotary Screen, Richard Ian Stessel and S. C. Kranc, EM Mar. 92, p604-619.

**Solid wastes**

Particle Motion in Rotary Screen, Richard Ian Stessel and S. C. Kranc, EM Mar. 92, p604-619.

**Spherical shells**

Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.

**Splines**

New Spline Finite Element for Plate Bending, S. C. Fan and M. H. Luah, EM June 92, p1065-1082.

**Stability**

Analytical Solution of Steady Seepage into Double-Walled Cofferdams, Sunirmal Banerjee and Angel Muleshkov, EM Mar. 92, p525-539.

Branch Switching in Bifurcation of Structures, Fumio Fujii and Kok Keong Choong, EM Aug. 92, p1578-1596.

Critical Review of Thin-Plate Stability Equations, John Platt, Gwynne Davies and Cyril Snell, EM Mar. 92, p481-495.

Destabilizing Effect of Magnetic Damping in Plate Strip, Jong S. Lee, EM Jan. 92, p161-173.

Dynamic Behavior of Nonlinear Cable System. II, S. Mesarovic and D. A. Gasparini, EM May 92, p904-920.

Dynamic Elastic-Plastic Buckling Behavior Illustrated by Simple Model, Yading Yue and Jijia Zheng, EM Oct. 92, p2005-2016.

Elastic Stability of Composite Column, Yaxin Li, EM Nov. 92, p2320-2327.

Force Deformation Equations for Initially Curved Laterally Loaded Beam Columns, R. E. McConnel, EM July 92, p1287-1302.

Nonlinear Stability Analysis of Steel Members by Finite Element Method, Zuyan Shen and Qilin Zhang, EM Mar. 92, p445-461.

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

Stability of Column Lowered Into Liquid of Higher Density, C. Y. Wang, EM Jan. 92, p204-210.

Stability of Masonry Piers and Arches, Thomas E. Boothby and Colin B. Brown, EM Feb. 92, p367-383.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Stable Controllers for Instantaneous Optimal Control, J. N. Yang, Z. Li and S. C. Liu, EM Aug. 92, p1612-1630.

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Stability analysis**

Flexural-Torsional Stability of Thin-Walled Columns, Juha Paavola and Seppo Salonen, EM Dec. 92, p2384-2400.

Stability of Built-up Columns, Atle Gjelsvik, EM June 91, p1331-1345.

Stability of Frames with Grade Beam and Soil Interaction, George Lin, EM Jan. 92, p125-139.

**Static loads**

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

Response of Plates of Arbitrary Shape Subject to Static Loading, K. M. Liew, EM Sept. 92, p1783-1794.

**Static structural analysis**

Analytical Solutions for Thick, Doubly Curved, Laminated Shells, Jiarang Fan and Juyong Zhang, EM July 92, p1338-1356.

**Statistical analysis**

Micromechanical Model to Predict Sand Densification by Cyclic Straining, Ricardo Dobry and Emmanuel Petrakis, EM Feb. 90, p288-308.

Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Statistical data**

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

**Statistics**

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

Simulation of Improved Gaussian Time History, Loren D. Lutes and Jin Wang, EM Jan. 91, p218-224.

Simulation-Based Excursion Statistics, Gordon A. Fenton and Erik H. Vanmarcke, EM June 92, p1129-1145.

**Steady state**

Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

**Steel**

Nonlinear Stability Analysis of Steel Members by Finite Element Method, Zuyan Shen and Qilin Zhang, EM Mar. 92, p445-461.

**Steel frames**

Damage Diagnosis of Steel Frames Using Vibrational Signature Analysis, G. C. Yao, K. C. Chang and G. C. Lee, EM Sept. 92, p1949-1961.

Seismic Performance of Fixed-Base and Base-Isolated Steel Frames, A. N. Lin and H. W. Shenton, III., EM May 92, p921-941.

**Steel plates**

Elastic Buckling of Incomplete Composite Plates, Koichi Sato, EM Jan. 92, p1-19.

**Steel structures**

Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.

**Stiffness**

Axial and Free-Bending Analysis of Spiral Strands Made Simple, Mohammed Raoof and Yu Ping Huang, EM Dec. 92, p2335-2351.

Stability of Built-up Columns, Atle Gjelsvik, EM June 91, p1331-1345.

Transition Plate-Bending Elements for Compatible Mesh Gradation, Chang-Koon Choi and Yong-Myung Park, EM Mar. 92, p462-480.

**Stiffness matrix**

Stiffness Matrix for Nonlinear Analysis of Thin-Walled Frames, Aura Conci, EM Sept. 92, p1859-1875.

Timoshenko Beam Element Resting on Two-Parameter Elastic Foundation, L. M. Shirima and M. W. Giger, EM Feb. 92, p280-295.

**Stochastic models**

Simulation-Based Excursion Statistics, Gordon A. Fenton and Erik H. Vanmarcke, EM June 92, p1129-1145.

**Stochastic processes**

Conditional and Joint Failure Surface Crossing of Stochastic Processes, Øistein Hagen, EM Sept. 92, p1814-1839.

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Strain**

Damage of Concrete in Fatigue, A. Alliche and D. François, EM Nov. 92, p2176-2190.

Use of Engineering Strain and Trefftz Theory in Buckling of Columns, C. M. Wang and W. A. M. Alwis, EM Oct. 92, p2135-2140.

**Strain hardening**

Steady-State and Multiple Cracking of Short Random Fiber Composites, Victor C. Li and Christopher K. Y. Leung, EM Nov. 92, p2246-2264.

**Strain rate**

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Extended Split-Hopkinson Bar Analysis for Attenuating Materials, Conrad W. Felice, Edward S. Gaffney and Joseph A. Brown, EM May 91, p1119-1135.

Rate Effects in Uniaxial Dynamic Compression of Concrete, Tianxi Tang, Lawrence E. Malvern and David A. Jenkins, EM Jan. 92, p108-124.

**Strain softening**

Compression Failure of Quasibrittle Material: Nonlocal Microplane Model, Zdeněk P. Bažant and Joško Ožbolt, EM Mar. 92, p540-556.

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Hierarchical Single-Surface Model for Static and Cyclic Behavior of Interfaces, N. Navayogarajah, C. S. Desai and P. D. Kiousis, EM May 92, p990-1011.

Micromechanics-Based Constitutive Model for Interface Shear, M. P. Divakar and A. Fafitis, EM July 92, p1317-1337.

**Strength**

Fracture-Based Two-Way Debonding Model for Discontinuous Fibers in Elastic Matrix, Christopher K. Y. Leung, EM Nov. 92, p2298-2318.

**Stress**

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Elastic Buckling Coefficients for Long, Unstiffened Plates, Julie Mark Cohen, EM Dec. 92, p2491-2496.

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

High-Order Theory for Sandwich-Beam Behavior with Transversely Flexible Core, Y. Frostig, M. Baruch, O. Vilnay and I. Sheinman, EM May 92, p1026-1043.

Probability of Crack Growth in Poisson Field of Penny Cracks, S. Mesarovic, D. Gasparini, S. Muju and M. McNelis, EM May 92, p961-978.

Use of Engineering Strain and Trefftz Theory in Buckling of Columns, C. M. Wang and W. A. M. Alwis, EM Oct. 92, p2135-2140.

**Stress analysis**

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

**Stress concentration**

Novel Photoelastic Approach in Analysis of Elliptical Holes in Thick Plates, Sameh S. Issa and G. A. Maamoun, EM Aug. 92, p1631-1645.

Torsional Stresses in Tubular Lap Joints with Tapered Adherends, D. Chen and S. Cheng, EM Sept. 92, p1962-1973.

**Stress distribution**

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

**Stress intensity factor**

Cracking and Debonding on Bimaterial Interface under Uniform Loading, Mikiya Okumura, Norio Hasebe and Takuji Nakamura, EM June 92, p1113-1128.

Probability of Crack Growth in Poisson Field of Penny Cracks, S. Mesarovic, D. Gasparini, S. Muju and M. McNelis, EM May 92, p961-978.

Stochastic FEM Based on Local Averages of Random Vector Fields, W. Q. Zhu, Y. J. Ren and W. Q. Wu, EM Mar. 92, p496-511.

**Stress strain relations**

Compressive Softening Model for Concrete, Eiji Mizuno and Shigemitsu Hatanaka, EM Aug. 92, p1546-1563.

Constitutive Model for Concrete in Strain Space, O. A. Pekau, Z. X. Zhang and G. T. Liu, EM Sept. 92, p1907-1927.

Elastoplastic Deformation for Particulates with Frictional Contacts, Ching S. Chang, Anil Misra and Kofi Acheampong, EM Aug. 92, p1692-1707.

Hypoplastic Model for Sands, J. P. Bardet, EM Sept. 90, p1973-1994.

Knowledge-Based Modeling of Material Behavior with Neural Networks, J. Ghaboussi, J. H. Garrett, Jr. and X. Wu, EM Jan. 91, p132-153.

**Stress strain relations, soils**

Extended Split-Hopkinson Bar Analysis for Attenuating Materials, Conrad W. Felice, Edward S. Gaffney and Joseph A. Brown, EM May 91, p1119-1135.

Numerical Study of Soil Anisotropy, A. Anandarajah, EM Jan. 92, p211-216.

**Structural analysis**

Boundary-Element Direct Reanalysis for Continuum Structures, J. H. Kane, B. L. Keshava Kumar and R. H. Gallagher, EM Aug. 92, p1679-1691.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

**Structural behavior**

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Structural control**

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

**Structural design**

Classical Buckling Load of Spherical Domes Under Uniform Pressure, Haruo Kunieda, EM Aug. 92, p1513-1525.

Homogeneous Structures Subjected to Repeated Structural System Changes, Luigino Dezi, Giovanni Menditto and Angelo Marcello Tarantino, EM Aug. 90, p1723-1732.

**Structural dynamics**

Correction Criteria of Finite Element Modeling in Structural Dynamics, M. Tong, Z. Liang and G. C. Lee, EM Apr. 92, p663-682.

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

**Structural members**

Inelastic Response of Variable Stiffness Members under Cyclic Loading, Demeter G. Fertis and Chin T. Lee, EM July 92, p1406-1422.

Nonlinear Stability Analysis of Steel Members by Finite Element Method, Zuyan Shen and Qilin Zhang, EM Mar. 92, p445-461.

**Structural reliability**

Conditional and Joint Failure Surface Crossing of Stochastic Processes, Øistein Hagen, EM Sept. 92, p1814-1839.

Load-Space Formulation for Time-Dependent Structural Reliability, R. E. Melchers, EM May 92, p853-870.

Reliability of Geometrically Nonlinear PR Frames, Achintya Haldar and Yiguang Zhou, EM Oct. 92, p2148-2155.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

**Structural response**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures II, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1441-1456.

Interactive Base-Isolation Foundation System: I. Finite Element Formulation, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2048-2058.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Structural stability**

Optimal Design of Structures with Kinematic Nonlinear Behavior, S. Pezeshk, EM Apr. 92, p702-720.

**Structures**

Aseismic Hybrid Control of Nonlinear and Hysteretic Structures I, J. N. Yang, Z. Li, A. Danielians and S. C. Liu, EM July 92, p1423-1440.

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Critical Review of Thin-Plate Stability Equations, John Platt, Gwynne Davies and Cyril Snell, EM Mar. 92, p481-495.

Stable Controllers for Instantaneous Optimal Control, J. N. Yang, Z. Li and S. C. Liu, EM Aug. 92, p1612-1630.

Thermal Stresses in Bi-Coated Structures, Mauro Ferrari and Luca Lutterotti, EM Sept. 92, p1928-1938.

**Submarine pipelines**

Buckle Propagation in Submarine Pipelines, G. D. Hahn, M. She and J. F. Carney, III., EM Nov. 92, p2191-2206.

**Systems**

Power Flow and Energy in Primary-Secondary Systems, G. Chen and T. T. Soong, EM May 92, p1046-1051.

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Tall structures**

Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

**Tanks**

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Temperature**

Creep and Creep Rupture of Metallic Composites, D. N. Robinson, W. K. Binienda and M. Miti-Kavuma, EM Aug. 92, p1646-1660.

**Tendons**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

**Tension**

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.

Nonlinear Impulsive Motions of Low-Tension Cables, Michael S. Triantafyllou and Christopher T. Howell, EM Apr. 92, p807-830.

Theoretical Study of Stability Criteria for X-Bracing Systems, Dong Q. Wang and Arthur P. Boresi, EM July 92, p1357-1364.

**Tension leg platforms**

Asymptotic Analysis of TLP Tendons and Risers, C. Oran, EM Jan. 92, p56-73.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

**Tests**

Evaluation of Plastic Bifurcation for Plane Strain versus Axisymmetry, Dunja Perić, Kenneth Runesson and Stein Sture, EM Mar. 92, p512-524.

**Theories**

Family of Iterative Shear-Deformation Theories for Shallow Shells, Zenon Rychter, EM Nov. 92, p2159-2175.

**Thermal analysis**

Steady-State Nonlinear Heat Transfer in Multilayered Composite Panels, Ahmed K. Noor and Lazarus H. Tenek, EM Aug. 92, p1661-1678.

**Thermal factors**

Thermomechanical Buckling of Multilayered Composite Plates, Ahmed K. Noor and Jeanne M. Peters, EM Feb. 92, p351-366.

Three-Dimensional Solutions for Thermal Buckling of Multilayered Anisotropic Plates, Ahmed K. Noor and W. Scott Burton, EM Apr. 92, p683-701.

**Thermal stresses**

Thermal Stresses in Bi-Coated Structures, Mauro Ferrari and Luca Lutterotti, EM Sept. 92, p1928-1938.

**Thickness**

Analysis and Implementation of Thin-Layer Element for Interfaces and Joints, K. G. Sharma and C. S. Desai, EM Dec. 92, p2442-2462.

Boundary-Continuous Fourier Solution for Clamped Mindlin Plates, Humayun R. H. Kabir and Reaz A. Chaudhuri, EM July 92, p1457-1467.

Fundamental Frequency of Tapered Plates by Differential Quadrature, Anant R. Kukreti, Jalaleddin Farsa and Charles W. Bert, EM June 92, p1221-1238.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

**Thin shell structures**

Buckling of Pressurized Axisymmetrically Imperfect Cylinders Under Axial Loads, Jin-Guang Teng and J. Michael Rotter, EM Feb. 92, p229-247.

Load Shortening in Plastic Buckling of Cylinders, Marwan El-Bkaily and Ralf Peek, EM Sept. 92, p1892-1906.

Response Variability of Structures Subjected to Bifurcation Buckling, G. V. Palassopoulos, EM June 92, p1164-1183.

**Thin wall sections**

Flexural-Torsional Stability of Thin-Walled Columns, Juha Paavola and Seppo Salonen, EM Dec. 92, p2384-2400.

Sensitivity Analysis of Thin-Walled I-Beams Resting on Elastic Foundation, B. B. Budkowska and C. Szymczak, EM June 92, p1239-1248.

Stiffness Matrix for Nonlinear Analysis of Thin-Walled Frames, Aura Conci, EM Sept. 92, p1859-1875.

**Three-dimensional analysis**

Three-Dimensional Solutions for Thermal Buckling of Multilayered Anisotropic Plates, Ahmed K. Noor and W. Scott Burton, EM Apr. 92, p683-701.

**Time dependence**

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Load-Space Formulation for Time-Dependent Structural Reliability, R. E. Melchers, EM May 92, p853-870.

Time Domain Analysis of Dynamically Loaded Single Piles, S. M. Mamoon and P. K. Banerjee, EM Jan. 92, p140-160.

**Torsion**

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Exact Solution for General Torsion Problems Using Boundary Singularities, Omri Rand, EM Oct. 92, p2141-2147.

Flexural-Torsional Stability of Thin-Walled Columns, Juha Paavola and Seppo Salonen, EM Dec. 92, p2384-2400.

Sensitivity Analysis of Thin-Walled I-Beams Resting on Elastic Foundation, B. B. Budkowska and C. Szymczak, EM June 92, p1239-1248.

Torsional Stresses in Tubular Lap Joints with Tapered Adherends, D. Chen and S. Cheng, EM Sept. 92, p1962-1973.

**Toughness**

Fracture Analysis of Mortar-Aggregate Interfaces in Concrete, Kwang Myong Lee, Oral Buyukozturk and Ayad Oumera, EM Oct. 92, p2031-2047.

**Transfer functions**

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

**Transient response**

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

**Transmission lines**

Coupled Vertical and Horizontal Galloping, Kathleen F. Jones, EM Jan. 92, p92-107.

**Transportation**

Noise Barrier Simulated by Rigid Screen with Back Wall, L. H. Huang and T. M. Kung, EM Jan. 92, p40-55.

**Triaxial tests**

Analysis of Membrane Penetration in Triaxial Test, Steven L. Kramer, N. Sivaneswaran and R. O. Davis, EM Apr. 90, p773-789.

**Tube joints**

Torsional Stresses in Tubular Lap Joints with Tapered Adherends, D. Chen and S. Cheng, EM Sept. 92, p1962-1973.

**Tubes**

Comparative Evaluation of Plasticity Theories against Tension-Torsion Test at Finite Strain, Ali H. Al-Gadhib and Kerry S. Havner, EM Oct. 92, p2104-2126.

Local Buckling of Tubes in Elastic Continuum, James A. Cheney, EM Jan. 91, p205-216.

**Tuned liquid dampers**

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Tuned mass dampers**

Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

**Turbulent flow**

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

**Two-dimensional**

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Explicit Equations of Motion of Discrete System of Disks in Two Dimensions, Oleg Vinogradov, EM Sept. 92, p1850-1858.

**Uncertainty analysis**

Response of Systems with Uncertain Parameters to Stochastic Excitation, H. Jensen and W. D. Iwan, EM May 92, p1012-1025.

**Variability**

Fundamental Frequency of Tapered Plates by Differential Quadrature, Anant R. Kukreti, Jalaleddin Farsa and Charles W. Bert, EM June 92, p1221-1238.

Mechanics of Shape Optimization in Plate Buckling, Mahesh D. Pandey and Archibald N. Sherbourne, EM June 92, p1249-1266.

**Variance analysis**

Multivariable Analysis Using Isoparametric Finite Elements, Ping Wang and William K. Rule, EM Aug. 92, p1730-1737.

**Velocity**

Multivariable Analysis Using Isoparametric Finite Elements, Ping Wang and William K. Rule, EM Aug. 92, p1730-1737.

**Vibration**

Damage Diagnosis of Steel Frames Using Vibrational Signature Analysis, G. C. Yao, K. C. Chang and G. C. Lee, EM Sept. 92, p1949-1961.

Destabilizing Effect of Magnetic Damping in Plate Strip, Jong S. Lee, EM Jan. 92, p161-173.

Elastic Stability of Heavy Rotating Columns, C. M. Wang, EM Jan. 90, p234-239.

Frequency Domain Analysis of Undamped Systems, Eduardo Kausel and Jose M. Roësset, EM Apr. 92, p721-734.

Hypar Shell on Pasternak Foundation, D. N. Paliwal, S. N. Sinha and A. Ahmad, EM July 92, p1303-1316.

Interactive Base-Isolation Foundation System: II. Parametric Study, Ki Jun Ahn and Phillip L. Gould, EM Oct. 92, p2059-2071.

Modal Synthesis Method for General Dynamic Systems, L. E. Suarez and M. P. Singh, EM July 92, p1488-1503.

Nonlinear Free Vibration of Laminated Composite Plates, Alavandi Bhimaraddi, EM Jan. 92, p174-189.

Quantitative NDE Technique for Assessing Damages in Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM July 92, p1468-1487.

Theoretical Study of Crack-Induced Eigenfrequency Changes on Beam Structures, Robert Y. Liang, Jialou Hu and Fred Choy, EM Feb. 92, p384-396.

Vibration Control of Beams by Beam-Type Dynamic Vibration Absorbers, Tadayoshi Aida, Susumu Toda, Norio Ogawa and Yasuo Imada, EM Feb. 92, p248-258.

**Vibration control**

Vibration Control of Beams by Beam-Type Dynamic Vibration Absorbers, Tadayoshi Aida, Susumu Toda, Norio Ogawa and Yasuo Imada, EM Feb. 92, p248-258.

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Viscoelasticity**

Wave Attenuation in Viscoelastic Continuum with Fading Memory, Song-tao Xue, Jun Tobita, Tetsuya Hanzawa and Masanori Izumi, EM Aug. 92, p1597-1611.

**Viscosity**

Collisional Restitution Dependence on Viscosity, Jan Lundberg and Hayley H. Shen, EM May 92, p979-989.

**Viscous flow**

About Moving Contact Lines, Shih-An Yang and Allen T. Chwang, EM Apr. 92, p735-745.

Collisional Restitution Dependence on Viscosity, Jan Lundberg and Hayley H. Shen, EM May 92, p979-989.

**Voids**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

**Walls**

Development of Design Spectra for Actively Controlled Wall-Frame Buildings, Y. P. Wang, A. M. Reinhorn and T. T. Soong, EM June 92, p1201-1220.

**Warpage**

Stiffness Matrix for Nonlinear Analysis of Thin-Walled Frames, Aura Conci, EM Sept. 92, p1859-1875.

**Water waves**

Tuned Liquid Damper (TLD) for Suppressing Horizontal Motion of Structures, Yozo Fujino, Limin Sun, Benito M. Pacheco and Piyawat Chaiseri, EM Oct. 92, p2017-2030.

**Wave attenuation**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

Wave Attenuation in Viscoelastic Continuum with Fading Memory, Song-tao Xue, Jun Tobita, Tetsuya Hanzawa and Masanori Izumi, EM Aug. 92, p1597-1611.

**Wave equations**

Wave Attenuation in Viscoelastic Continuum with Fading Memory, Song-tao Xue, Jun Tobita, Tetsuya Hanzawa and Masanori Izumi, EM Aug. 92, p1597-1611.

**Wave propagation**

Dynamic Stresses in Granular Assemblies with Microstructural Defects, A. Shukla, C. Y. Zhu and Y. Xu, EM Jan. 92, p190-201.

**Wave spectra**

Kinematics of Nonlinear Random Waves near Free Surface, Sau-Lon James Hu and Dongsheng Zhao, EM Oct. 92, p2072-2086.

**Waves**

Parametric and External Excitation of Marine Risers, S. K. Thampi and J. M. Niedzwecki, EM May 92, p942-960.

**Wedges**

Antiplane Problems of Monoclinic Material, Chien-Ching Ma, EM Sept. 92, p1765-1782.

**Welds**

Fatigue of Welded Cruciforms Subjected to Narrow-Band Loadings, S. Sarkani, D. P. Kihl and J. E. Beach, EM Feb. 92, p296-311.

**White noise**

Nonstationary Response of Structures with Closely Spaced Frequencies, Kangming Xu and Takeru Igusa, EM July 92, p1387-1405.

**Width**

Deflections of Beams with Varying Rectangular Cross Section, Filippo Romano and Gaetano Zingone, EM Oct. 92, p2128-2134.

**Wind**

Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

Effect of Static Offset on TLP Modeling, C. Oran, EM Jan. 92, p74-91.

Three-Dimensional Characteristics Model of Wind-Generated Turbulent Flow, Panayis-Fokion Matsoukis and Aristotelis Papadopolis-Dezorzis, EM Aug. 92, p1526-1545.

**Wind forces**

Control of Along-Wind Response of Structures by Mass and Liquid Dampers, Y. L. Xu, B. Samali and K. C. S. Kwok, EM Jan. 92, p20-39.

Coupled Vertical and Horizontal Galloping, Kathleen F. Jones, EM Jan. 92, p92-107.

Frequency Domain Optimal Control of Wind-Excited Buildings, J. Suhardjo, B. F. Spencer, Jr. and A. Kareem, EM Dec. 92, p2463-2481.

Probabilistic Description of Buffeting Response of Long-Span Bridges, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2401-2420.

Probabilistic Description of Buffeting Response of Long-Span Bridges: II, Friedrich J. Wall and Christian G. Bucher, EM Dec. 92, p2421-2441.

**Wind loads**

Wind Effects on Base-Isolated Structures, Yu Chen and Goodarz Ahmadi, EM Aug. 92, p1708-1727.

**Wire rope**

Free-Bending Fatigue Life Estimation of Cables at Points of Fixity, Mohammed Raoof, EM Sept. 92, p1747-1764.
